# BREM. INNOVATION AND TRADITION

HEATING ELEMENTS THROUGH RESEARCH, EXPERIMENTATION AND INNOVATIVE DESIGN WITH RESPECT FOR TRADITION

BREM IS THE PRODUCT OF MEN AND WOMEN,  
NOT ONLY TECHNOLOGY AND MACHINES,  
SKILLED PEOPLE WHO CAN COMPLETE EVEN THE  
MOST DEMANDING PROJECTS ON TIME AND  
TRAINED IN THE TRANSFORMATION OF STEEL  
INTO PRODUCTS OF THE HIGHEST QUALITY  
AND WITH A HIGH AESTHETIC VALUE.

BREM: THE COLLECTION 2021

- 26 RADIATOR MODELS
- 48 HEATED TOWEL RAIL MODELS
- 10 CHROME-PLATED HEATED TOWEL RAILS
- 100.000 STANDARD SERIES DIMENSIONS
- 44 ELECTRIC TOWEL-RAILS and Radiators
- BREM'ART: RADIATOR ART
- VALVES, ACCESSORIES AND SUPPORTS

## STRENGTHS

Specialized in the design and production of radiators and heated towel rails using steel tubes, BREM operates at the top end of the market thanks to the superior quality, original aesthetics, and many other distinctive features of its products.

### QUALITY OF MATERIALS

High-quality steel produced to strict international standards; impeccable, high-precision working; secure, invisible welding; high gloss, bright and even paint treatment.

### DESIGN

Manifolds with particular shapes; slender, flattened columns; tubes with exclusive shapes; adjustable brackets integrated into the radiator.

### FUNCTIONALITY

The countless standard series versions possible (high, slender, long, wide, flat, etc.), permit the optimum insertion of the heating element in any space at all.

### RANGE

A complete collection composed of 22 radiator models and 35 heated towel rail models ensures the most appropriate aesthetic solution for every interior.

### MADE-TO-MEASURE VERSIONS

The elevated productive flexibility and constructive process of the radiators guarantee response to even the most unusual requests with a virtually unlimited number of applications.

## CHARACTERISTICS

In the context of elevated aesthetic content, all BREM products meet the needs of living comfort, economical use, practical management, and easy installation.

### REDUCED WEIGHT

Weight up to 1/3 lower than traditional tube heating elements and up to 1/8 lower than cast-iron radiators thanks to the use of slender tubes that also facilitate shipping and installation.

### LOW WATER CONTENT

Reduction of up to 1/3 of the quantity of water required by traditional radiators.

### INSTANT HEATING

The programmed temperature is reached rapidly thanks to the quality of steel used and the quick circulation of the small quantity of water contained.

### COMFORTABLE ENVIRONMENT

Immediate stopping of heat emission by thermostat for greater comfort at constant temperature.

### ENERGY SAVINGS

Lower energy consumption (thanks to lower volume of water to be heated) required for optimum heat emission.

### COMFORTABLE WARMTH

Heating takes place by irradiation and convection. The sensation of wellbeing is guaranteed by the high percentage of heat irradiated.

## ADVANTAGES

Depending on the model, BREM radiators permit:

- more rational installation without limits of any kind for more uniform heat distribution;
- larger radiating surfaces that increase the quantity of heat transmitted through irradiation for greater comfort;
- higher protection against cold walls and better ascending convection movement thanks to the larger surface area on the back;
- original solutions even embedded in the floor that contrast with greater efficacy the dispersion of heat through large glassed surfaces;
- the adaptation of the radiator to the space available with the possibility for positioning even at full height alongside these glassed surfaces for greater contrast to heat dispersion;
- the possibility to use the space beneath the window sill as well.

Using different types of feet and support, BREM frees radiators from their traditional position on the wall to let them live in greater freedom through creative positioning elsewhere in the room, such as:

- partition walls or screens in the center of the room
- railings for stairways or balconies
- in corners with two or more radiators
- as a vertical arch on the wall
- curved or in all the creative shapes technically possible.

# TECHNICAL DATA

## TECHNICAL DATA

Symbols	Unit
H height	cm
L length /width	cm
p depth	mm
▲▽ tapping centres (t.c.)	mm
PE element step	mm
A surface	m <sup>2</sup>
V volume	dm <sup>3</sup>
M weight empty	kg
Qn nominal calorific power	W
Q heat output	W
S surface of heat output	S
n exponent	-
ck correction factor for Qn	-
m flow rate	kg/s
EHE Electric Heating Element	W

## COEFFICIENT OF TRANSFORMATION

1 W = 0,86 kcal / h  
1 kcal / h = 1,16 W

## NOMINAL QN INDEX

Nominal heat output index in Watts  $\Delta t^n = 50K$   
According to the EN 442 regulations, the heat output of a radiator is calculated according to the following conditions:

t <sub>1</sub>	inlet temperature	75°C
t <sub>2</sub>	outlet temperature	65°C
t <sub>m</sub>	average water temperature	70°C
t <sub>r</sub>	reference air temperature	20°C
K	water temperature	10 K
$\Delta t$	air-water temperature difference	50 K
$\Delta t$ different from 50 K	Q = Qn ( $\Delta t / 50$ ) <sup>n</sup>	

## CORRECTION FACTORS ( $\Delta t$ different from 50K)

n \ $\Delta t$	1,20	1,22	1,24	1,26	1,28	1,30
30k	0,542	0,536	0,530	0,526	0,520	0,514
40k	0,766	0,762	0,759	0,755	0,751	0,748
50k	1	1	1	1	1	1
60k	1,245	1,248	1,253	1,258	1,263	1,267
70k	1,498	1,507	1,518	1,527	1,538	1,549

## AMBIENT TEMPERATURE different from 20°

To increase or to decrease the temperature of a room, apply the index defined in the catalogue to the following theoretical coefficients:

temperatures	24°C	22°C	20°C	18°C	15°C	12°C
multiplier	0,81	0,90	1,00	1,04	1,10	1,17

## CONNECTING THE RADIATOR

As standard, Brem radiators are supplied with  $\varnothing 3/8"$  -  $\varnothing 1/2"$  attachment points.  
In the instructions for each model a formula is shown to define the distance between centres of the connections.  
(eg. model FH: tapp. centres = width - 40 mm)

To make the connections without the radiator, use a template with the distance between the tapping centres marked on it.

## RECOMMENDED INSTALLATION HEIGHTS

When replacing old radiators, make sure that there are no "siphons" created when installing the new fittings.

## INSTALLATION AND EFFICIENCY

Always respect the position of the delivery and return fittings when connecting BREM radiators.

If EG fittings, the delivery must be at the bottom, on the left; if the position of the delivery is inverted ("G"), the radiator will not heat up completely.

A central heating plant providing pressure of 1.5/1.8 bar ensures that the radiators work evenly and efficiently.

If there is not enough pressure, hot water will not reach all points and the radiators will not warm up completely.

Check the pressure in column radiator systems, especially in residential blocks.

Make sure that there are no throttled pipes in the plant.

Bleed the air completely from the radiator.

Balance the plant by partially closing the water outlet valve.

LAME is composed of rectangular tubes connected by round bars. The heating

elements cut the air like knives and stand alongside one another in light to create

a new heating shape like no other and enliven modern sculpture for interior décor.

design Davide Brembilla

LAME-UP is free-standing radiator designed by Davide Brembilla, its heating body

acting like a totem pole in the centre of a room. The fins, arranged vertically, produce

a new, versatile and highly functional way to exploit the available volumes.

TORRI radiators are inspired by the jagged skyline of a modern metropolis. The challenge

was to design a tall, slim radiator that would act as an architectural feature in the dome-

stic environment. TORRI radiators are made from parallel, totally plain, steel plates. *design Bettazzi + Percoco*

design Luigi Brembilla

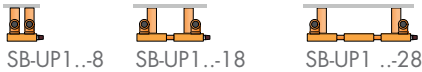

The SBARRA-UP radiator is ideal for those spaces where every centimetre counts. SBARRA-UP can be placed wherever you

want, has great heat output and can either blend into the background or stand out, depending on the colour. What's more, the

elements can be overlapped and/or multiplied by a factor of 3 to get a particularly striking effect.

META is constructed with the columns welded to the section of the manifold with an ES

(element step) that can be varied from 30 to 70 mm at 5 mm intervals.

The heating element can be composed using columns of 50 or 70 mm depth.

### DIMENSIONS

Width: from 10,5 cm to 6m

Height: from 21 to 220 cm

Depth: M1000: 8,2/10,2 cm  
M2000: 12,9/16,9 cm

Depth from wall: M1000: 11,5/13,5 cm  
M2000: 15,5/19,5 cm

Widths from 3 elements to 6 m

$L = (\text{no. of elements} - 1) \times \text{PE (step)} + 45 \text{ mm}$

PE = step between elements:

30 - 35 - 40 - 45 - 50 - 55 - 60 - 65 - 70 mm

The radiator heat output is determined by multiplying the heat output of a single column by the number of elements.

The cost of the column is determined only by its height and does not depend on its depth or step between elements.

The cost of the radiator is determined by multiplying the unit price of one column by the number of elements and then adding this to the fixed price.

### How to choose the META radiator

Given the number of Watts necessary to heat a room (e.g. 1175 W) with a radiator at a height of 200 cm, find the number of elements by varying the step as required by the space available:

MODEL	el.	l(cm)	W	€
M7 1200/70	8	53,5	1173	449,60
M7 1200/50	9	44,5	1173	493,80

Straight, compact, and high thickness fins that cut the uniformity of the wall express a

new concept for heated towel rails that enliven and furnish bathroom walls.

*design Davide Brembilla*  
The unusual and absolutely unexpected shape is as surprising as good sculpture can be.

design Davide Brembilla

Straight, compact and high thickness fins that cut the uniformity of the wall express a

new concept for heated towel rails that enlighten and furnish bathroom walls.

The unusual and absolutely unexpected shape is as surprising as good sculpture can be.

HERG's is a new towel rails that recalls the simple heated towel rails.

The protagonist is the large rectangular tube arranged in regular rhythms that gives

caloric performance for the complete comfort of the bathroom.

# SBARRA

PRICE FROM 10.1.2022 **+10%**

design Luigi Brembilla

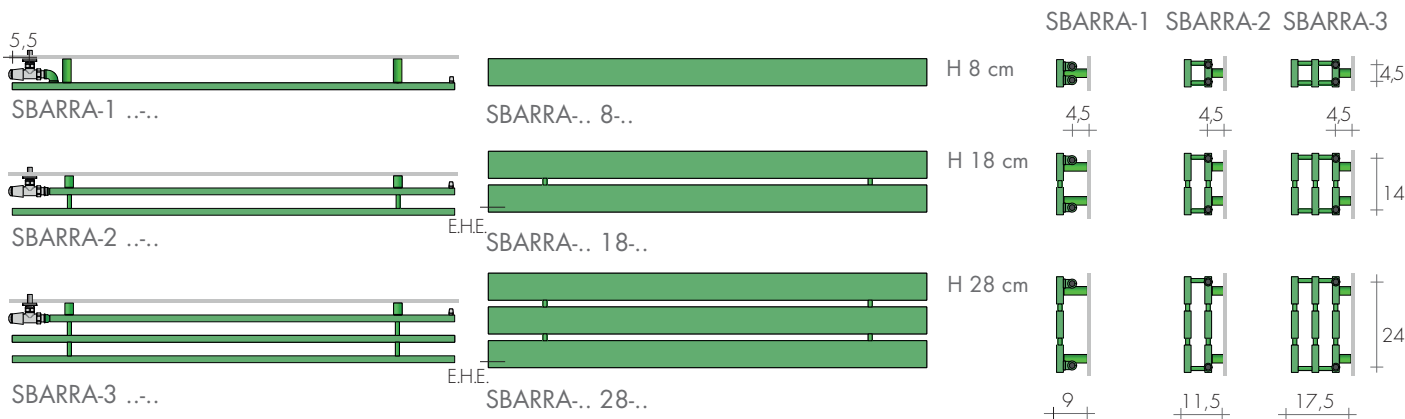

The SBARRA towel heater is ideal when every centimetre must be exploited due to a

lack of space. SBARRA is practical, has high heat output and can be placed wherever

you want. It can fade into the background or, with the use of colour, made to stand out.

KUO is an original take on Japanese formalism and essential lines.

Its pure form is the result of using a flat plate with vertical elements laid down its

*design Davide Brembilla*  
sides to limit the space and give a sense of slimness and vertical continuity.

# CROSS-Q WITH OVERLAPPING SQUARES

PRICE FROM 10.1.2022 **+10%**

Large, variously assembled, rectangular tubes are used to produce CROSS-Q.

Innovative radiators thanks to 90° corners and strong geometric shapes (squares and

rectangles) sitting on top of each other.

CROSS-G radiator, only 2 cm of depth, consists of a large rectangular frame,

elegant and protagonist, enriched by vertical tubes and thin steel strips, to obtain

high yields. Its particular design makes it suitable to be used in every room.

$\Delta t$  different from 50 K: consult Technical data Brem

## PRODUCTION ON REQUEST

Thermal output and prices can be obtained by interpolation:

- height of manifolds every 3 cm
- length of radiating tubes every 10 cm

Made-to-measure ( $\pm 3$  mm)

Sizes over 3 m: price on request  
Height every 5 cm: increased size +10%

## DOUBLE VERSION CGDV

by joining two Cross-CGV radiators

Standard EG fitting (delivery and return at front), B15 brackets

Thermal output CGDV: single radiator x1,65

PRICE CGDV

CGV x 2 + 116,00€

Large, variously assembled, rectangular tubes are used to produce an innovative

radiator. CROSS-V represents absolute linearity: a simple or a double rectangle to

complete and add the variegated CROSS-Q solutions.

# CROSS WITH CROSSED SQUARES

PRICE FROM 10.1.2022 **+10%**

design Luigi Brembilla

Interwoven squares and rectangles to create a radiator with an unusual look.

Can be used as a towelheater, or simply a decorative feature in any room.

The geometric shapes can be multiplied at will, always resulting in a harmonious whole.

# CROSS-R WITH OVERLAPPING RECTANGLES

PRICE FROM 10.1.2022 **+10%**

design Luigi Brembilla

Rectangles sitting one on top of another to create a truly special radiator. CROSS-R is with

side fittings on the rear rectangle, thus hiding the valves and minimizing its projection from

the wall. Can be used as a towelheater, or simply a decorative feature in any room.

## DIMENSIONS

Widths: 60/68/80/104/144/168 cm

# CROSS-RV WITH OVERLAPPING RECTANGLES

PRICE FROM 10.1.2022 **+10%**

design Luigi Brembilla

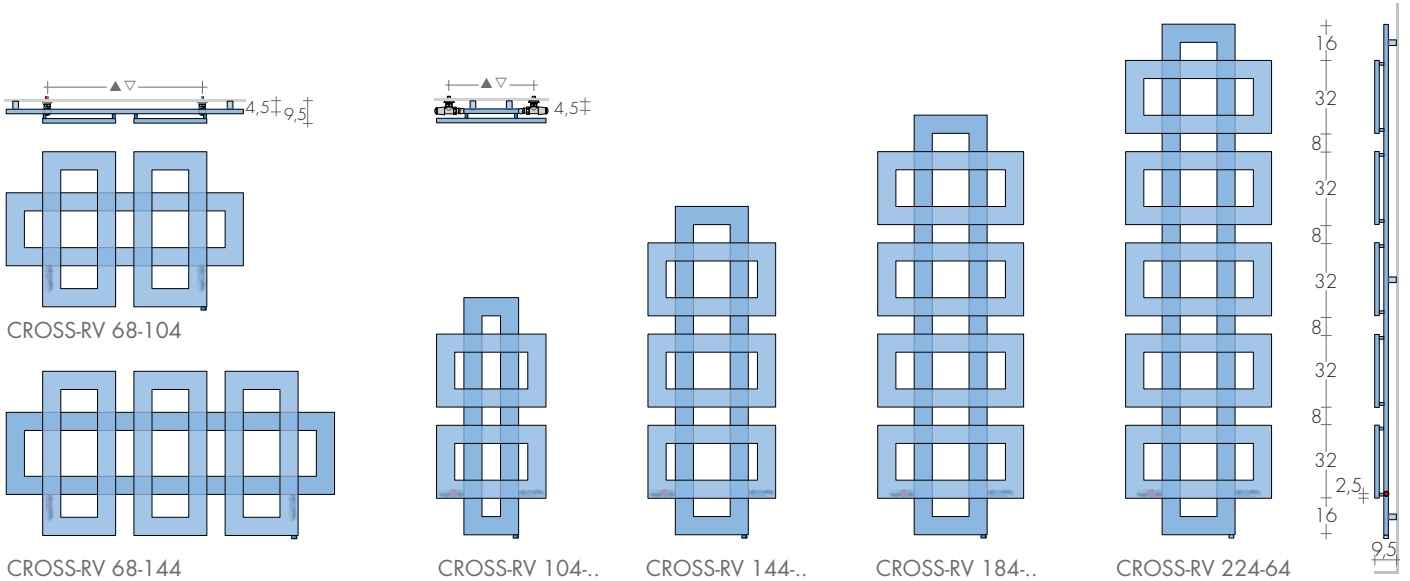

A regular pattern of rectangles sitting one on top of another to create a most linear

heating element. It can be used as a heated towel rail or a

purely decorative radiator to suit different locations of the house.

ESSEN: a simple geometry forms a towel heater composed by one single kind of

tube, to give an intriguing aesthetics and high performances. A big frame which has

a rectangular section takes place of usual manifolds and avoids high heating outputs.

QUAR: an original heated towel rail with a pure geometrical expression.

In QUAR, the tube is square, not round. A large rectangular section frame replaces

the usual manifolds while increasing heat output at the same time.

QUAR 127-46

design Pietro Facheris

PIT towel heater has an elegant minimalist design, with two or three radiant rectangles,

overlapping each other. Space is optimized by multiplying the heat

output and rectangular sections create three different points of support for towels.

ASYMP 105-48

Its elegant, essential rectangular frame is enriched with horizontal tubes that act

as heated towel heaters. Reminiscent of the louvres found in sun blinds, the towel

heaters are slightly curved and slant downwards for easier, quicker drying. *design Luigi Brembilla*

design Luigi Brembilla

KORE is a heated towel rail made using the exclusive flat curved Brem tubes as manifolds, with the addition of small radiating tubes

applied in an original hooking design, with the aim of obtaining high thermal outputs to satisfy the requirements of the bathroom.

The frames only can be additionally enhanced with the application of gilded leaf on BRO019 color and silver leaf on BRO002 color.

# KORE COR - KORE CROM

**+10%**  
PRICE FROM 10.1.2022

KORE COR resumes the graphic play expressed in Kore with only one frame, elegant and essential. On request, available with the addition of three radiating tubes for

towels. KORE MIRA steps away from the traditional heated towel rail function with the application of mirror inside the frame. An impressive and unusual interior décor

effect. KORE COR models available in gold and aluminium color can be additionally enhanced with the application of gilded and silver leaf

# TRAP

PRICE FROM 10.1.2022 **+10%**

*design Luigi Brebbilla*

TRAP is the solution for those wanting a creative, atypical alternative to enliven the

usual lines of a bathroom. More than just a useful, practical radiator,

TRAP is a proper piece of sculpture to furnish and express great personality.

design Luigi Brembilla

Like looking out of a window or down a stairwell. Spaces that get smaller and smaller,

forming a 3D frame that both heats and decorates. Spaces that create an absolutely

novel radiator that will never go unobserved: only later is it discovered and remarked upon.

# PANELS

LAMINA: a new smooth and rigorous radiant plate, elegance obtained by hiding behind valves and manifolds. The angled edge transforms this plate into a very thin and minimal element of 1,2 cm.

LAMINA

CLAK is the radiant panel with a refined and essential aesthetic and a minimum depth of 2,3 cm (page 102).

S-PLATT is the radiant panel with a flat and smooth surface in colored finishes or in gold / silver leaf, stainless steel with 3,6 cm of depth (page 110).

CLAK

S-PLATT

LAMINA: a new very thin and rigorous radiant plate, minimalism and elegance

obtained by hiding valves and air vent, but can be adjustable

The manifolds are white in order to be fitted to the wall.

Height: from 169 to 229 cm  
Width: from 32 to 97 cm  
Depth: 4,5/6 cm  
Depth from wall: 8 cm

# SPH - PLATT

PRICE FROM 10.1.2022 **+10%**

SPH-PLATT is the radiating plate with perfectly flat and smooth surfaces: true

simplicity of form is the greatest thing. Laid vertically in the most traditional

colors SPH-PLATT jolts pure reason into the irrationality of the unexpected.

## DIMENSIONS

Lengths: from 28 to 84 cm

Heights: from 160 to 240 cm (every 20 cm)

# SPV - PLATT

PRICE FROM 10.1.2022 **+10%**

SP-PLATT is a perfectly flat, smooth radiating plate. It comes in the simple horizontal

version (SPV) or with radiating plates fitted at the back in varying heights (SPLV). S-Platt

plates are painted white sablé as standard. Ideal for artistic rendering, as requested

Lengths every 10 cm: thermal output and prices obtained by interpolation

# S-EVID

PRICE FROM 10.1.2022 **+10%**

design Davide Brembilla

Vertical coloured slits are cut by hand into the plate's unrelenting geometrical purity. The

colors of the plate and the slot blend harmoniously together and give shape to a new

decorative element of great charm, emotion and high intensity.

## DIMENSIONS

Lengths: from 35 to 70 cm

Heights: 180 / 200 / 220 cm

Depth: S-EVID 3,7, SL-EVID 6,2 cm

Depth from wall: S-EVID 6,8, SL-EVID 7,8 cm

The EGON radiator is produced using flattened tubes, curved horizontally or vertically:

the imperceptible curvature of the tube, which determines the shape of the EGON radiator

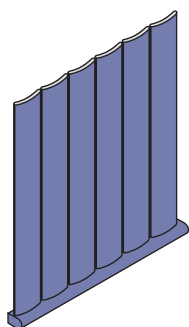

is slightly larger than the traditional flattened tube and increases the emission of heat.

## EH MODEL

with flat vertical tubes

L = from 1 to 15 el. (every 7,7 cm)

H = from 60 to 300 cm

Mod. Egon vertical manifold n° el (height) length cm  
EV 5 EL - 220

EV

**DOUBLE VERSION EDV**

Is obtained by joining two plates EV  
EDV price EV x 2 + 111,40€

Standard EG fitting (delivery on left, at front; return on right, at rear).

Thermal output EDV: single radiator x1,70

**PRODUCTION ON REQUEST**

Height of plate every 10 cm: thermal index and prices can be obtained by interpolation

Made-to-measure ( $\pm 3$  mm)

Thermal output by interpolation

Sizes over 15 elements and 3 m: price on request

Length for cm: increased size +20%

OPEN is a panel with flattened tubes that are welded to the manifolds placed at the

rear to create a perfectly flat radiating surface with radiating tubes providing movement.

OPEN panel can be either horizontal or vertical, single or double and with fins at the rear

Heights: from 60 to 240 cm  
 Lengths: from 28,9 to 91 cm (n° el. x 7,15 + 0,25)  
 Depths: 4,3 / 6 / 5,3 cm  
 Depths from wall: 6,8 / 7,5 cm

## TAPPING CENTRES

EG vertical fittings as standard  
 Side fittings on request without extra

## SPECIAL FITTINGS

SUIT-H is created with flattened tubes that merge imperceptibly with the manifolds

assembled in such way as to create a completely flat radiating surface cadenced by the

union of its various elements. Is available in single or double form and with fins at the rear.

MODEL SUIT-H..  
with flattened vertical tubes

H = 60 to 360 cm  
(every 20 cm)

L = 14 to 140 cm  
(1 to 20 elements)

### TAPPING CENTRES

width cm

HLH 180 - 49

### HOW TO ORDER

State: model (L indicates fins) with height and length in cm; fitting and color if different from standard  
eg.: HL 180 - 49, AC  $\varnothing$  1/2", RAL 3005

### HEIGHTS ON REQUEST

H, HL, H-2, HLH: 120, 140, 150 cm  
H, H-2: 300, 320, 340, 360 cm  
Heights every 10 cm: thermal output and price by interpolation; see price of increased size.  
Heights every 1 cm: thermal output by interpolation; price: increased size + 20%  
lengths up to 1,4m: contact Brem technical office

### STANDARD PRODUCTION

White "sablé" paintwork - EOS brackets  
Air vent  $\varnothing$  1/2" - Tolerance  $\pm$  3 mm  
Maximum operating pressure 6 bar.

### PRODUCTION ON REQUEST

Paintwork to Brem color list up to 3 m  
+15/25%  
(ask for feasibility in case of higher values)

We find the characteristics of the flat tubes assembled also in SUIT-V, where

the manifold and flat tubes are perfectly matched together. Here, however, the

heating element is positioned horizontally. In single or double version, with fins at the rear.

## RECOMMENDED VALVES

### CHROME PLATED VALVES KIT WITH:

- n°2 Valves with O-ring Tangs
- n°2 Fittings (multilayer ø16, copper ø12,14)
- n°2 Round washers

On request: Polished stainless tube cover  
(to be cut to right size) Art. CA18 10,80€

### COLORED QUADRA VALVES

page 279

### REMOTE FITTINGS Art. REM 36,60€

Remote fittings at the rear: ▲▼ L - 5cm

2,5 ±

REMOTE VALVES ASSEMBLY KIT p. 281 with:  
- n°2 Fittings (multilayer ø16, copper ø12,14)

REMOTE TON VALVES ASSEMBLY KIT  
Art. KVG 153,60€

SIDE CONTROL TON VALVES KIT  
page 277 Art. KVL 130,90€

SIDE CONTROL TON VALVES KIT with  
THERMOSTATIC head Art. KTL 177,10€

REMOTE TON VALVES ASSEMBLY KIT with  
THERMOSTATIC head Art. KVGt 199,80€

Low, very low, attractive, with a flat front with a minimal presence, practical for the

most various usages. The high convective heating power of this

model is obtained through the application of fins that increase heat output considerably.

MODEL C... ..  
H = 7 - 14 - 21 - 28 cm  
L = 50 to 600 cm

MODEL C...  
front and rear in radiating tubes

MODEL C... /L  
with fins at rear

### HOW TO ORDER

State: model (L indicates fins at the rear ), height in cm, n. of radiating tubes and length in cm; fittings and color if different from standard. eg.: C14-3L 360 AC ø 1/2" RAL 7015

### STANDARD PRODUCTION

White glossy paintwork RAL 9016  
Brackets and feet not included page 287  
Maximum operating pressure 6 bar

### PRODUCTION ON REQUEST

Paintwork to Brem color list up to 3 m or 100kg (ask for feasibility in case of higher values) +15/25%  
Special versions page 284

### STANDARD FITTINGS

EG ø 1/2"  
AC or BD fittings on request  
Special fittings, page 286

### TAPPING CENTRES

EG vertical fittings as standard  
Side fittings on request without extra

Models with tubes at the rear

Models with fins at the rear

Mod. C7 (h 7 cm)

Offset fittings on the same side only for:  
C7-3, C7-3/L, C7-4, C7-4/L, C7-5, C7-5/L

Coupling protrusions: 3 mm for  $\varnothing 1/2''$   
17mm for  $\varnothing 3/4''$

PANELS

### C-PROLUX FIXINGS

In C-Prolux radiators, the brackets and feet in soundproofed plastic are not included in the packaging.  
The number of brackets and feet varies according to the diagrams provided.

### FIXINGS ON WALL

Brackets for convectors are provided on request:

galvanised Art.142 41,70€  
white Art.142W 55,90€

### FEET

Adjustable zinc-plated feet and sound-proofed supports:

galvanised Art.150 49,80€  
white Art.150W 70,60€  
colored Art.150V 83,20€

H = 6,5/9 cm  
H = 12/18 cm  
H = 18/27 cm  
H = 27/37 cm

Diagrams for the positions of the feet or brackets for the C-Prolux assembly

Plastic foot covers (80x80x4mm) are available in white colour only. Art. 156 12,40€

### RECOMMENDED VALVES

CHROME PLATED VALVES KIT WITH:

- n°2 Valves with O-ring Tangs
- n°2 Fittings (multilayer  $\varnothing 16$ , copper  $\varnothing 12,14$ )
- n°2 Round washers

On request: Polished stainless tube cover (to be cut to right size) Art. CA18 10,80€

### COLORED QUADRA VALVES

page 279

### SIDE CONTROL TON VALVES KIT

page 277

Art. KVL 130,90€

### SIDE CONTROL TON VALVES KIT with

THERMOSTATIC head

Art. KTL 177,10€

design Luigi Brembilla

Essential, light, and eclectic in design, CUBICO is the Brem towel warmer

where the minimalism and elegance of the radiating plate are enhanced by the

playful and versatile insertion of a cubic or parallelepiped shaped support.

Clark is an ultra-thin steel plate, just 2.3 cm thick, that has been cross cut asymmetrically

and set in a rectangular framework of steel tubes of similar thickness. The two elements

*design Luigi Brembilla*  
(standard colour: white) can be painted in any of the shades in the Brem colour list.

design Davide Brembilla

RAM, presented on CLAK plate, offers the freedom to simply and quickly accessorize any BREM radiating plate. This innovative

magnetic accessory, composed of an extremely slender tubular structure can be applied to any flat metal surface.

Towel rack elements can be shifted into the composition required to personalize the radiating plate for the function desired.

# SO-FLEX HEATED TOWEL RAILS

PRICE FROM 10.1.2022 **+10%**

SO-FLEX goes beyond the basic idea of a towel heater (order and folding) and intro-

duces a new concept: practical disorder, careless gestures and the fun of not having

to fold everything, but simply chuck a used towel into a warm shell.  
*design Gabriella Almagioni*

# SLIDE

PRICE FROM 10.1.2022 **+10%**

design Davide Brembilla

The project starts from the decomposition of a flat surface, creating dynamic volumes.

The sculptural forms of the heating element has great impact in the domestic atmosphere.

SLIDE has a high heating output, 600 to 900 watt, and different color finishes.

design Davide Diliberto

VELETTA for Brem was designed to hide bathrobes and towels without the use of sliding walls or doors.

The radiating plate is split in half by a fold that creates a separate wing from the wall for a practical, simple solution.

Two magnetic knobs on the back let you hang bathrobes wherever desired.

A basic shape that's also highly decorative and versatile. Fits into a variety of different

settings. An extra tool for architects, letting them add a romantic, friendly or modern twist

to their projects, depending on the choice of colour and finish.

RAW a particularly iconic product, its curved 25 mm diameter tubes have been

assembled and welded to form box shapes with an attractive diagonal cross in the centre.

Form without form, three dimensional and yet empty, a framework. *design Davide Diliberto*

The design of the FORM radiator pays a lot of attention not only on the shape of the

manifolds and the extremely reduced sizes of the radiating tubes, but also on the high

technology applied in its construction which allows an impeccable finish.

## MODEL F...H

with vertical radiating tubes

H = from 60 to 300 cm (every 20 cm)

L = from 20 to 116 cm (every 6 cm)

Metal reinforced on radiator backs for heights greater than 80 cm.

F2H

1 tube every 2 cm

F3H

2 tubes every 3 cm

## MODEL F...V

with horizontal radiating tubes

H = from 20 to 116 cm (every 6 cm)

L = from 60 to 300 cm (every 20 cm)

Metal reinforced on radiator backs for lengths greater than 80 cm.

F2V

1 tube every 2 cm

F3V

2 tubes every 3 cm

$\Delta t$  different from 50 K: consult Technical data Brem

## HOW TO ORDER

State:  
model, height and width in cm;  
fitting and color if different from standard.

Mod. pitch horizontal height length  
Form 2 cm manifold cm cm

F2H 200 - 50

eg. : F2H 200-50, AC  $\varnothing$  3/8", RAL 3003

## PRODUCTION ON REQUEST

Thermal output and prices by interpolation:  
- length of manifolds every 2 cm  
- height of radiating tubes every 10 cm

Made-to-measure ( $\pm 3$  mm)

Sizes over 3 m: price on request  
Size every 1 cm: increased size +20%

F2H

DOUBLE VERSION FDH is obtained  
by joining two F2H radiators  
FDH price : F2H x 2 + 111,40€  
Thermal output FDH: F2H x 1,60

Standard EG fitting: delivery on left,  
at front; return on right, at rear.

## HOW TO ORDER

State:  
model, height and width in cm;  
fitting and color if different from standard.

## PRODUCTIONS ON REQUEST

Thermal output and prices by interpolation:  
- height of manifolds every 2 cm  
- length of radiating tubes every 10 cm

Made-to-measure ( $\pm 3$  mm)

Sizes over 3 m: price on request  
Size every 1 cm: increased size +20%

## DOUBLE VERSION FDV

is obtained by joining two F2V radiators  
FDV price F2V x 2 + 111,40€

Standard EG fitting (delivery on left, at front;  
return on right, at rear).

Thermal output FDV: single radiator x 1,65

## PRODUCTION ON REQUEST

Thermal output and prices by interpolation:  
- height of manifolds every 3 cm  
- length of radiating tubes every 10 cm

Made-to-measure ( $\pm 3$  mm)

Sizes over 3 m: price on request  
Size every 1 cm: increased size +20%

Metal reinforced on backs for lengths greater than 80 cm

The Form F2H and F2V radiator is also produced in an exclusive chrome plated

version to obtain a particular effect in the room. FORM CROM is produced as

standard in the sizes shown in the table (max sizes).

# FORM ONDULATO

PRICE FROM 10.1.2022 **+10%**

The Form F2H radiator is standard produced in the FORM ONDULATO model with just

two curves: curvature is more accentuated in the upper part and less pronounced in the

lower part. Also available made-to-measure according to the Form F2H and F2V models.

$\Delta t$  different from 50 K: consult Technical data Brem

FORM ONDULATO (wavy) is made-to-measure on the basis of the following specifications:

- ends of tubes with a minimum of 15 cm straight pipe
- radius of curvature greater than 15 cm
- tolerance  $\pm 3$  mm
- depth  $\leq 36$  cm

Attach drawing with measurements for estimate.

### STANDARD PRODUCTION

White "sablé" paintwork-white M4F brackets  
Chrome-plated finish - chrome-plated brackets  
Tolerance  $\pm 3$ mm -Max. working pressure 8Bar

### PRODUCTION ON REQUEST

Brem color chart painting (with chrome-plated brackets) +15/25%  
Made-to-measure, by estimate

### STANDARD FITTING

GRATA is a radiator of sought-after design and high thermal output. These characteristics make

the GRATA useful when a very decorative effect is needed, with the addition of feet and

clamps, allows it also to be used as a room partition, parapet or staircase handrail.

## MODEL GRH

with vertical radiating tubes

H = from 60 to 300 cm (every 20 cm)  
Height on request every 5 cm

## HOW TO ORDER

State: model, height and width in cm; connection and color if different from standard.  
eg.: GRH 180 - 38, AC  $\varnothing$  3/8", SB 2008

## PRODUCTION ON REQUEST

Thermal output and prices can be obtained by interpolation:  
- length of manifolds every 3 cm  
- height of radiating tubes every 10 cm

Made-to-measure ( $\pm 3$  mm)

Sizes over 3 m: price on request  
Height every 5 cm: increased size +15%

GRH

## DOUBLE VERSION GDH

Is obtained by joining two GRH radiators  
PRICE GDH GRH x 2 + 111,40€  
Standard EG fitting (delivery on left, at front; return on right, at rear).  
Thermal output GDH: single radiator x 1,60

$\Delta t$  different from 50 K: consult Technical data Brem

## PRODUCTION ON REQUEST

Thermal output and prices can be obtained by interpolation:  
 - height of manifolds every 3 cm  
 - length of radiating tubes every 10 cm

Made-to-measure ( $\pm 3$  mm)

Sizes over 3 m: price on request  
 Height every 5 cm: increased size +15%

## DOUBLE VERSION GDV

Is obtained by joining two GRV radiators  
 PRICE GDV GRV x 2 +111,40€

Standard EG fitting (delivery on left, at front; return on right, at rear).

Thermal output GDV: single radiator x1,65

The WIND mini-column radiators are built using elements from three to six columns,

made from circular cross section radiating tubes. Depending on the number requested,

the batteries of elements are obtained by welding the required number together.

ELEMENT STEP: PE = 3 cm

TUBES DIAMETER:  $\varnothing = 1,5$  cm

LENGTH OF RADIATORS ( $\pm 3$  mm):  
number of elements x 3 cm

Rear metal reinforcement from 21 elements

H = from 29 to 200 cm

L = from 30 to 108 cm (every 3 cm)

MODEL W 3 with 3 radiating tubes element

MODEL W 4 with 4 radiating tubes element

MODEL W 5 with 5 radiating tubes element

MODEL W 6 with 6 radiating tubes element

### STANDARD TAPPING CENTRES

AC - BD / AD - BC  $\varnothing 1/2"$

Side fittings  $\blacktriangle \nabla = H-4,6$  cm

### TAPPING CENTRES $\pm 6$ CM

Use chrome-plated offset couplings to adjust the tapping centres up to 6 cm (Art. EC.. page 274)

### STANDARD PRODUCTION

SB9016 white sablé paintwork, with brackets  
Air vent  $\varnothing 1/2"$  - Tolerance  $\pm 3$  mm  
MAXIMUM WORKING PRESSURE, 8 BAR

### PRODUCTION ON REQUEST

Brem color chart painting with brackets  
in the same color +15/25%  
Batteries with non standard n° of elements.

### STANDARD FITTINGS

AC - BD / AD - BC  $\varnothing 1/2"$

# KUADRUM

PRICE FROM 10.1.2022 **+10%**

KUADRUM: radiator with 15x15 mm square tubes.

Modern technology for new balance. The square tube offers excellent heat

output and great looks. The series of tubes creates a sense of a full surface.

## MODEL K..H

KQH: vertical tubes, squared manifold at front  
KCH: vertical tubes, curved manifold at front

H = from 60 to 300 cm (every 20 cm)

L = from 20 to 100 cm (every 5 cm)

Element step = 2,5 cm

Rear metal reinforcement for H > 100 cm

KQH

vertical manifold height cm lenght cm

## PRODUCTION ON REQUEST

Made-to-measure ( $\pm 3$  mm) with:  
- height of manifolds every 2,5 cm  
- lenght of radiating tubes every 10 cm  
- thermal output and prices by interpolation.  
Lenght every 1 cm: increased size +20%  
Sizes over 3 m: by estimate

## DOUBLE VERSION K..DV

Is obtained by joining two KV radiators  
K..DV price  $K..V \times 2 + 115,90\text{€}$

Standard EG fitting (delivery on left, at front, return on right, at rear).

Thermal output K..DV: single radiator  $\times 1,65$

design Davide Diliberto

A particularly iconic product, its curved 25 mm diameter tubes have been assembled

and welded to form box shapes with an attractive diagonal cross in the centre.

We report the main measures for use in the bathroom.

## DIMENSIONS:

Lengths: from 50 to 157 cm

Heights: from 50 to 210 cm

Depth: 10 cm

Depth from wall: 13,5 cm

A heated towel rail made from round curved tubes and handtowel shelves.

Its original shape encourages you to enter: in fact, the largest model even has a metal seat.

Once inside, the warmth gently caresses you: an important accessory for the bathroom.

The high thermal output and much reduced protrusion of the round tubes with curved

corners are the main characteristics of the MAHN heated towel rail. The beauty of

radiators using thin tubes is highlighted by the absence of sharp corners.

The PLUS 12 towel heater has three series of ø14 mm thin tubes to offer high output.

The manifolds, with their round tubes, are extremely compact to minimise space.

The PLUS 12 comes in all the shades in the Brem colour list.

# START CURVO

PRICE FROM 10.1.2022 **+10%**

The START CURVO is the first heated towel rail with rounded surfaces. The original design

of pure and slightly arched lines makes START unique in shape while increasing its

practicality. The valves are positioned on the inside, reducing the total space taken up.

The START heated towel rail is produced using thin radiating  $\varnothing 12$  tubes connected to vertical manifolds forming the exclusive

pointed arch shape. The straight version is unusual in that it has offset upper tubes to improve the distribution of the heat.

The valves are positioned on the inside, to produce a clean design, reducing the total space taken up by the towel rail.

SHAR has all the main characteristics of a traditional heated towel rail. Its aesthetic

harmony arises from the semi-oval shape of the manifolds, which are reduced to minimum

dimensions and with radiating tubes of  $\varnothing$  15 mm, they portray lightness and solidity.

*design Luigi Brembilla*

With a rigorous and slender upward design GUGLIA contains inside a niche where the

wipes can be placed on functional shelves. The vertical development and the terminal part

developed in an arch, they look at the style of Gothic architecture.

A new sense of harmony in the bathroom: KUAD is a reversible towel-heater that can

be fitted with either the flat or the curved side of the collectors in full view.

We recommend using Quadra valves if the flat side of the collectors is visible.

# ELECTRIC HEATING ELEMENT

**+10%**  
PRICE FROM 10.1.2022

The EU 2015/1188 ECODESIGN standard provides that electric towel heaters and radiators, in order to save energy, work with devices equipped with weekly programming, electronic temperature control and open window detector.

BREM uses PTC electric heating element. PTC means "Positive Temperature Coefficient" and characterizes the electrical behaviour of the semiconductor heater segment: with increasing temperature the resistance of the PTC element rises instantaneously and reduces automatically the power output generating the so called "self-limiting" effect.

The class II PTC heating up process will automatically go through three phases:

- Start-up. In the first 60 sec the PTC works at 130% circa of the nominal power ("turbo boost power" effect) to trigger best the convection inside the radiator;
- Nominal power phase. In this phase the PTC heating elements reaches the equilibrium temperature working at the nominal power;
- Energy saving phase. With the increasing of the ambient temperature the power output decreases until a new equilibrium is reached where the power consumption is reduced (typically at 70% - 80% of the nominal power).

The PTC electric heating elements (CE marked) have the following advantages:

- Intrinsic safety (no risk of overheating, burnings or fire)
- No need of thermofuse and therefore no more burnt heaters also in case of partial filling
- Reduced diameter and length vs constant power heaters (in particular 11 mm diameter also for class II elements)
- No cold lengths (differently from constant power heaters which require not heating zones for the thermostat and the thermofuse)
- Better circulation and faster heat-up times
- Absolutely no noise due to cavitation effects
- Better duration thanks to the reduction of the PTC on/off phases.

1200W and 1500W electric heating elements work using constant power and are equipped with thermal limiter that stops the emission of heat.

R.E. Brem special  $\varnothing 3/8"$  stainless steel electric heating element can:

- be angled  $\pm 90^\circ$  to provide a better cable direction to the wall or to the electric socket
- be mounted in the  $\varnothing 1/2"$  connection with an adapter (possible reduction from  $1/2$  to  $3/8$ )

## RADIO FREQUENCY RECEIVER wall-recessed

868.3 Mhz radio receiver, connected with the cable to the power grid and to the electric heating element, remotely controlled by the thermostat, it controls the ignition and shutdown of the radiator.

4,8 x 5,1 x 2,8 cm

Wall recessed radio frequency receiver  
(takes up the space of 2 modules)

Art.RIE 106,70€

Communication between chronothermostat and radio fr. receiver is wireless, by radio transmission

## RADIO FREQUENCY RECEIVER wall-mounted

868.3 Mhz radio receiver, connected with the cable to the power grid and to the electric heating element, remotely controlled by the thermostat, it controls the ignition and shutdown of the radiator.

10,7 x 8,3 x 3,7cm

Radio frequency receiver, wall-mounted (for external use)

Art.RIC 121,10€

wall recessed Receiver

NOTE: THE ELECTRIC HEATING ELEMENT MUST BE CONNECTED TO AN ECODESIGN THERMOSTAT

## WIRELESS PROGRAMMABLE THERMOSTAT

White wireless programmable thermostat, with batteries, wall-mounted. Wireless transmission through radio waves. It maintains the programmed room temperature through the use of a receiver. The room thermostat also allows daily and weekly programming. Each thermostat can control multiple receivers (up to 12) but each receiver can be controlled by a single thermostat.

9,9 x 9 x 2,3 cm

Main functions: room temperature regulation (from  $+5^\circ\text{C}$ , - to  $+30^\circ\text{C}$ ), selection of operating modes (Auto-comfort, Eco, Anti-frost, Prog, Stand-by, BOOST), fast room heating thanks to the Boost forced gear function (instantaneous, programmable and deferred), keypad lock, security settings.

RE KIT: Class II Electric Heating Element, with 1,5m cable, diathermic liquid filling and plug (p.228)

RE KIT with WIRELESS DEVICES p. 229  
RE Kit: add radio frequency box receiver (wall-

mounted or recessed) and the radio programmable thermostat (it can control up to 12 radiators).

RT KIT: Class II Electric Heating Element, with 1/2" Faston fitting, diathermic liquid filling and plug  
RE KIT: Class II Electric Heating Element, with 1,5m cable, diathermic liquid filling and plug (p.228)

RT KIT with THERMOSTATS ECOdesign compliant ø1/2" fitting with Faston to connect:  
- Digital thermostat MUSA Plus (white or chr.-plated)  
- Thermostat STONE RICA **Bluetooth** via **App**

RE KIT with WIRELESS DEVICES p. 229  
RE Kit: add radio frequency box receiver (wall-mounted or recessed) and the radio programmable thermostat (it can control up to 12 radiators).

FITTINGS 286

BREM proposes the substitution of the traditional valves with one type of valve, which can also be used as lock-shield.

- Brem valves are complete with:
- chrome-plated o-ring tang ( $\varnothing 3/8'' - 1/2''$ )
  - chrome-plated fitting with o-ring
  - chrome-plated round washer ( $\varnothing 41 \times 6,5 \text{ mm}$ )
  - thermostatic head (for thermostatic valves)

On demand: stainless steel pipe cover to be cut to right size

## VALVES COMPONENTS

### CHROME-PLATED O-RING TANG

$\varnothing 3/8'' - 1/2''$

to connect to the radiator

1/2" Fitting Art. CVL12 8,50€  
3/8" Fitting Art. CVL38 8,50€

### CHROME-PLATED FITTINGS (24F19)

to connect to the system:

Multilayer fittings  $\varnothing 10-14, 12-16, 13-18, 14-18, 16-20$  Art. RM.. 8,60€

Copper fittings  $\varnothing 10-12-14-15-16-18$   
Art. RR..(R10 - R12 - R...) 6,20€

### VALVE FITTING KIT (Includes 3 fittings)

Fitting for multilayer  $\varnothing 16$  and inserts for copper tube  $\varnothing 12$  and  $\varnothing 14$  Art. RK 7,50

Fitting with inserts for multilayer  $\varnothing 16$

inserts for copper  $\varnothing 14$

inserts for copper  $\varnothing 12$

## VALVES ACCESSORIES

ROUND WASHER chrome-plated  $\varnothing 41 \text{ mm}$   
for tubes  $\varnothing 10 - 12 - 14 - 15 - 16 - 18 - 1/2''$   
(indicate  $\varnothing$ ) Art. RC.. 3,00€

### TUBES COVERS for fittings

10 cm long, polished stainless steel tube: slide over pipes for fitting  $\varnothing \leq 16 \text{ mm}$  and cut in half to size using the round washer to cover the cut.

inner  $\varnothing 15 \text{ mm}$  Art. CA15 9,40€  
inner  $\varnothing 16 \text{ mm}$  Art. CA16 9,40€  
for valves KIT Art. CA18 10,80€

### SINGLE TUBE COVERING KIT

tapping centres 38mm, 5x10cm squared covering, and n° 2 tubes  $\varnothing 16$  or  $\varnothing 20 L=7 \text{ cm}$

Art. KM16 59,20€  
Art. KM20 61,80€

### CHROME-PLATED ECCENTRICS

Adaptors to be mounted between valve and radiator to vary tapping centre from 1 to 6cm.

Art. EC1 1 cm eccentric 12,10€  
Art. EC2 2 cm eccentric 16,50€  
Art. EC3 3 cm eccentric 18,90€

Specify when ordering if 1/2" or 3/8"

### THERMOSTATIC CHROME-PLATED HEAD

Thermostatic head with liquid sensor (only for valves with thermostatic option)

Art. STC 46,20€

Quotation:  
Thermostatic head with special finishings

# SPECIAL VERSIONS

**+10%**  
PRICE FROM 10.1.2022

## "IN CORNER" RADIATORS

On request, the EGON, KUADRUM, FORM and GRATA radiators can be supplied made-to-measure in corner configuration to ensure adequate heating in rooms where the conformation of walls, doors, and windows precludes more traditional positions for the radiators.

The most popular solutions are :

- with internal angle
- with external angle
- with two external angles

The use of special feet and fixings permits the most creative positioning of the radiator without limitation.

How to obtain prices and technical data:

- standard radiator price + connection price
- radiator width + (β) dimension see table below
- heating output: add outputs of each connected radiator

Extra for the connection in corner of two radiators with one element ≤ 32 cm.

External angle	Art. FAE	349,80€
Internal angle	Art. FAI	349,80€
Double angle		by estimate
Wooden box package		by estimate

Radiators in corner:

(β) dimension (mm) + standard radiator:

	Mod.	F2H	KH	GRH	EH
internal angle	β	25	30	30	20
external angle	β	20	25	30	25

Send a detailed drawing for a feasibility study and quotation.

## FRAME

On request, Form F2H and F3H, Kuadrum KQH, Grata GRH and Egon EH radiators are available with two lateral columns that form a frame with the following advantages:

- fittings with made-to-measure distances along one side of the radiating tube frame;
- opposing made-to-measure fittings along both sides of the radiating tube frame (providing the future possibility to replace the radiator without damaging the room's walls or pipes).

Width of the radiator with frame:  
L + 40 mm

"a" 11 mm (as standard)  
Other dimensions on request

## META

META radiators are built to measure (see indications below).

Send us a detailed drawing with measurements for a feasibility study and quotation.

## C-PROLUX®

C-PROLUX radiators are built to measure.

Send us a detailed drawing with measurements for a feasibility study and quotation.

FRAME Art. CF	€	H cm	Δt 50 K watt*

# RADIATOR FITTINGS

**+10%**  
PRICE FROM 10.1.2022

The fittings used to connect the radiators to the heating system consist of two 1/2" or 3/8" diameter sleeves on the manifolds, according to each model.  
The technical drawings for each model show how to calculate the distances between the fittings (tapping centres) as well as the min distance from the wall.

vertical fitting

side fitting

Fitting position  
▲ - delivery  
▼ - return  
s - bleed valve  
v - drain

## DUAL TUBE FITTINGS

This fitting is marked with letters showing the position of the other fittings:  
- the first shows the delivery  
- the second shows the return  
followed by the fitting diameter:  
e.g. AC  $\varnothing$  1/2"

## STANDARD FITTING

The radiator is produced with standard fittings as shown in the technical data.

FITTINGS ON REQUEST  
no extra charge  
(unless otherwise indicated)

## SINGLE-TUBE RADIATOR FITTING

The single tube is fitted (in line with the manifold) by adding a  $\varnothing$  1/2" fitting for the water to enter/exit and a  $\varnothing$  10 mm hollow separator (other diameters available upon request) inside the manifold for insertion of the valve probe.

Standard single-tube fitting:  $\varnothing$  1/2"  
probe hole:  $\varnothing$  10 mm Art. AM10 49,60€

The single-tube valve (p. 295) is supplied complete with 45 cm probe or small tube; on request:  
Art. S70 probe L = 70 cm 8,40€  
Art. S100 probe L = 100 cm 11,60€

Indicate the diameter of the fitting and probe if not standard.

The BREM  $\varnothing$  1/2" single/dual tube chrome-plated valve is fitted with  $\varnothing$  10 mm probe. It can be either manual or thermostat controlled and is fitted with a flow deviator to reverse the delivery and return.

ASK FOR FEASIBILITY AND FITTINGS POSITION

Single tube fitting NOT POSSIBLE for technical reason in the following models:

C-PROLUX	ALCOVA
LAME-UP	CLIP
SBARRA-3	EYE
SBARRA-Up 3	PIT
SPAZIO CHIUSO	SLIDE
KORE/K-COR	RAW
TRAP	VINCI
	ZOOM

## SPECIAL FITTINGS ON REQUEST

Special fittings Art. AS 75,50 €  
EG/GE Wind fittings Art. EGW 75,50 €

Check plant flow rate and working pressure for AB-BA, CB-DA, HG-KE, EK-GH, HK-KH fittings. Ask for feasibility and quotation

Fittings with 5 cm central tapping centre and inner probes (ask for feasibility):  
Art. ACB 127,00€

## PLUGS AND AIR VENTS

Art. T18	ch-plated $\varnothing$ 1/8" plug	3,00€
Art. T14	ch-plated $\varnothing$ 1/4" plug	3,00€
Art. T38	ch-plated $\varnothing$ 3/8" plug	3,00€
Art. T12	ch-plated $\varnothing$ 1/2" plug	3,00€
Art. S18	ch-plated $\varnothing$ 1/8" air vent	3,00€
Art. S12	ch-plated $\varnothing$ 1/2" air vent	2,80€

## VERTICAL FITTINGS

The fittings used to connect the heated towel rails to the central heating system consist of two  $\varnothing 1/2"$  sleeves on the manifolds (or  $\varnothing 3/8"$  according to the model).

The technical drawings for each model show how to calculate the distances between the fittings (tapping centres) as well as the min distance from the wall.

## SIDE FITTINGS

Side fittings (on request) consist of two sleeves on the side of the towel heater.

## REVERSE FITTINGS

Reverse fittings (supplied as standard on certain models) are designed so that the reverse valves are fitted without sticking out from the towel heater (Cross..).

## SINGLE-TUBE FITTING

The BREM  $\varnothing 1/2"$  single tube chrome-plated valve can be used in position E or G on heated towel rails with EG fittings.

The valve is fitted with a flow deviator to reverse the delivery and return and a  $\varnothing 10$  mm probe 45 cm long; on request:

Art. S70 probe L= 70 cm 8,40€  
Art. S100 probe L=100 cm 11,60€

## TOWEL HEATER FRAME

On request, Brem towel heaters are produced with an additional smaller frame, which can be mounted vertically, with 5 cm tapping centres or made to measure.

This solution not only increases the thermal output, but also allows existing connections to be used, and allows the use of electrical immersion heater for mixed operation. Feet and fixings are available on request.

Heated towel rail frame, painted in white, with fitting sleeves, heating element fittings and chrome-plated plug Art. CS 183,10€

## STANDARD FITTINGS

Heated towel rails have standard fittings, as indicated in the technical data.

## SPECIAL FITTINGS

Side, reverse and vertical fittings different from standard productions, ask for feasibility Art. AS 75,50€

## REMOTE VALVES FITTING

Fittings on the back  $\varnothing 24F19$  (see page 280) Art. REM 36,60€

# INDEX BREM'ART

ARTISTS' RADIATORS

## ART AND RADIATOR

Perennially in pursuit of new shapes and expressions that are also surprisingly practical in the garb given to heat, Brem asked artists to develop the theme with their own interpretations, inventions, and solutions.

This is "Brem'Art": a line of radiators designed by artists given complete freedom for the most creative expression of the function of heating.

EVERY WORK OF ART IS MADE BY HAND: THE MINIMUM IMPERFECTIONS AND IRREGULAR SHADING AND TONES OF COLOR ARE UNIQUE TO EACH PIECE AS IN EVERY REAL WORK OF ART.

### BREM SPECIAL COLORS AND FINISHES

- BR 0001, a transparent metallic bright finish, highlights the signs of working on iron (welding, scoring, brushing, rings, marks, etc.); the phosphate greasing process enhances the colors of steel in shades of grey, beige, blue, brown, and dark green, and makes each piece unlike any other.

This finish is a good example of "Rustic Art" and it is not available for the radiating plates.

- BR 0001 MS, a clear matte finish, transmits all the raw material's "brutality", whereas a shiny finish softens the look (not available for radiating plates).

- BR 0031 is a brushed-metal effect to hide scratches on the plates. Clear varnish.

- BR 0007 is the color that both comes closest to natural iron and best conceals possible imperfections.

- BR 0021 transparent polished finish, it transmits the brass effect, glimpsing weldings.

- BR 0022 BL polished and nuanced rust color finish

Finishes, colors and extras are indicated for each work of art.

CONTINUUM UNO 180-42

CONTINUUM TRE 180-49

Raffaele Cioffi has interpreted warmth by adding 3D effect moulds to the radiator, printed using special heat resistant inks. The works in the "CONTINUUM" series excite the emotions and feature alternating color schemes, thanks to a play of light and shadow. The artist recommends to use distant valves.

CONTINUUM UNO (H 125 x L 16 cm)\*  
Red screen printing 605,90€  
color recommended by the artist, Ral9005M

CONTINUUM TRE (H 45 x L 20 cm)\*  
Yellow screen printing 633,90€  
color recommended by the artist, BR0007.

\*to be added to the cost of the S-PLATT plate

ERUZIONE 200-35

Steven Cavagna has opted here to use precious gilded leaf details set against an oxidised steel background. An imaginary stream of cast gold arousing the imagination.

The stream is hand-made and always different for each radiator.

BREM'ART CREATIONS (page I)  
Bright shaded rust BR 0022 BL and gilded leaf, other BREM colors to quote

SCUDO DI ERACLE 200-49

Dedicated to the greatest antique greek hero, Scudo di Eracle is made of copper by the artist for BREM'ART. Antonio Pizzolante, with his own hands, creates the shield of Heracles out of copper; once again the artist joins together form and function, beyond the time.

SCUDO DI ERACLE (H 98 x L 28cm)  
work of art 1018,50€  
to be added to the cost of the S-PLATT plate

The artist suggests the plate in SB 0022 sablé rust nuanced color.

Note that this color nuance is not repeatable and has stains and tons always different, that make it unique.

# HEAT, SAVE, and DECORATE

HEAT WHILE SAVING MONEY: THE GREAT CHALLENGE IN BUILDING CLIMATE CONTROL. *ENG. FRANCESCO PAOLETTI*

## HEATING and SAVING

Everyone, and every designer, systems engineer, builder, and lawmaker is looking for ways to save on energy costs today in order to:

- reduce polluting atmospheric emissions;
- optimize comfort performance;
- lower energy consumption.

The world's two most common heating systems are:

## THE RADIATOR SYSTEM,

The classic heating system with a boiler or heat pump and radiators that thanks to rapid heat transmission (**low thermal inertia**) can:

- work with both low and high system water temperatures;
- ensure nearly instantaneous adjustments to temperature variation with user-friendly and inexpensive regulation systems in single rooms or entire areas;
- facilitate installation with lower costs;
- minimize pump electric power consumption.

**The low thermal inertia of the radiators makes it easy to keep the room at comfort temperature (20 °C) only when necessary, in this way permitting significant energy savings.**

## THE UNDERFLOOR RADIANT HEATING SYSTEM

(only with **high thermal inertia**) consists of cross-linked polyethylene or multilayer pipes laid on insulating panel incorporated in the floor's substrate screed and one or more circuits for the area to be heated.

- Floor surface temperature must never exceed 29 °C in the living areas and 35 °C in the service areas.
- Room temperature regulation can be either on/off type with water circulation interruption or delivery water temperature modulation type.
- Temperatures in single rooms/areas are adjusted by motorized valves in every circuit.
- Because the panels cannot ensure adequate comfort, bathrooms are supplied with a heated towel rail with either mixed or electric power.

The heat is initially transmitted to the floor screed and then transferred to the room for heating (**high thermal inertia**) with a substantial delay of usually no less than 6 hours between the request for/interruption of heat emission and the perception of heat in the room, in this way leading to higher energy consumption.

IN SHORT: THE ENERGY NEED DEPENDS ON THE BUILDING.

## A BUILDING'S ENERGY REQUIREMENT

depends on numerous physical phenomena associated with thermal exchange, heat transmission, and the type and characteristics of the heat generators and heating elements.

The main factors involved in determining the energy required to heat a building are therefore:

- the thermohygrometric characteristics of the building's constructive materials;
- the efficiency of the technological systems;
- auxiliary electric power consumption;
- building/heating system interaction;
- the building's intended use.

**Maximum efficiency and sustainability means achieving the maximum level of every parameter involved.**

## THE BUILDING ENVELOPE

is the most important element in determining the energy required to meet its heating needs. The quantity of heat needed to heat a building and therefore its energy requirement depends solely on its constructive features.

The thermal power that must be provided by the heating system to keep the building at a temperature of 20 °C is always the same regardless of the type of heating system used.

For example:

Energy class	Heated area	Thermal power required
- Class A	100 sq m	4,050 W
- Class G	100 sq m	13,000 W

The thermal power required depends on the building's insulation.

## BUILDING/HEATING SYSTEM INTERACTION

The building's intended use affects the heating system's operating modes:

- continuous;
- discontinuous.

For this reason, the heating system must be capable of optimizing its output as required by the operating mode.

Residential buildings, offices and schools are not occupied uninterruptedly and for such reason can be heated discontinuously, which is very useful whenever energy must be saved (current regulations specify heating system operation to different temperatures during the day).

**A home's comfort temperature (20 °C) must be constantly maintained only when its inhabitants are at home.**

THE DELIVERY OF THE ENERGY NEEDED DEPENDS ON THE HEATING SYSTEM.

## HEATING SYSTEM EFFICIENCY

is the heating system's performance in terms of:

- output, which depends on the characteristics of the heat generator;
- distribution, which depends on the characteristics of the hydraulic network;
- emission, which depends on the characteristics of the radiators in the room;
- regulation, which depends on the thermal inertia of the radiators.

- **OUTPUT EFFICIENCY** depends on the characteristics of the heat generator and the heating elements. The combustion efficiency for condensing boilers or the COP (coefficient of performance) for heat pumps depends on the average temperature of the system water. The lower this average temperature is, the higher the efficiency is.

- **COMBUSTION EFFICIENCY** depends on:

- the length of the connection network between the heat generator and the heating bodies (the length of the piping must be kept as short as possible and efficient insulation must be used);
- the average temperature of the water inside the piping and above all, its insulation (low temperature: < 50 °C);
- electrical power consumption (circulation pumps, motorized valves): the higher the consumption, the lower the efficiency.

The use of the following heating elements that operate at low temperature is also advised:

- fan coils;
- radiant panels;
- heating elements/radiators.

Regardless of their constructive material, all radiators are suited operation at both high and low temperature.

- **EMISSION EFFICIENCY** is one characteristic of heating elements. The thermal power delivered is indicated in the manufacturers' catalogs.

- **REGULATION EFFICIENCY** depends on numerous parameters, the most important of which is the heating system's thermal inertia. One positive aspect of radiators is the possibility they offer to take advantage of "bonus" temperature rises (sunshine, mid-seasonal rises, indoor heat, the presence of people, etc.) because their low thermal inertia allows them to immediately interrupt heat delivery (a form of regulation that is scarcely efficient for radiant panel systems).

**Low thermal inertia systems follow variations in temperature rapidly (both inside and outside the building) and have higher regulation efficiency than high thermal inertia systems.**

THE PERFORMANCE OBTAINED BY THE EFFICIENCY OF REGULATION OF DELIVERY IS FUNDAMENTAL.

# RADIANT PANEL and RADIATOR PERFORMANCE COMPARED

RESEARCH CONDUCTED BY ENG. FRANCESCO PAOLETTI PUBLISHED IN: [www.brem.it/riscaldare-risparmiare](http://www.brem.it/riscaldare-risparmiare)

RESEARCH AGREEMENT between the "Sergio Stecco" Energy Department at the UNIVERSITY OF FIRENZE and GLOBAL Srl.

The comparison was made in 2 test chambers of identical dimension, constructive type, and energy needs equivalent to an approx. 50-60 sq m Class A building, one with radiant panels and the other radiators, both equipped with a 7.5 kW heat pump. The thermal profile of the two test chambers may be considered reasonably comparable and therefore assumed as representative. The comparison between the energy consumed by the two systems is unconnected to the type of heat source used and is based on the actual heat entering each system.

## ANALYSIS OF THE RESULTS

Analyzing the energy charts and consumptions of the two systems shows that under all circumstances and operating modes (continuous/discontinuous):

- the radiant panel heating system consumes more energy than the radiator heating system;
- the electrical power consumptions of the radiant panel systems are always higher than those of the radiator system;
- at equivalent temperature set points, and despite the more refined regulation, the temperature of the room heated by radiant panels tends to be always higher than the other room. In particular, during time-band operation, higher temperatures are observed even with the system switched off, which in practice corresponds to moments in which the building is not occupied and therefore no need for heating exists.

This becomes more evident as outdoor temperatures rise and daily temperature variations increase (in mid-season), a condition typical to most heating system operating hours in most parts of Italy.

Also in the tests conducted with radiator water set at higher temperatures that seriously penalized consumption, significant savings were observed in radiator systems (in demonstration of the fact that the optimization of output efficiency may be all in vain if the emission system is not in the condition to maximize regulation efficiency).

In addition to thermal consumptions being always higher, also the electric consumptions of the radiant panel system were also always higher due to the higher pumping power necessary for the circulation of a higher quantity of water than in the radiator circuit.

The inadequacy and economic disadvantages of radiant panel heating for newly constructed Class A civil buildings characterized by very low heating loads and very low thermal inertia is plainly clear to see.

## RESULTS OF FIRST TEST CAMPAIGN

Total energy consumed from 10/02 to 01/05  
 Continuous 24 hour operation  
 Discontinuous operation with 2 time-bands  
 Discontinuous operation with 3 time-bands  
 Radiant panel on/off regulation  
 Radiator on/off regulation  
 Radiant panel average delivery temperature: 40 °C  
 Heat pump set-point temperature: 45 °C  
 Radiant panel active energy: 861,898 kW  
 Radiator active energy: 638,999 kW

## RADIANT PANEL ENERGY CONSUMPTION +34.9%

Days	Energy Consumption Panels kWh	Energy Consumption Radiators kWh	DIFFERENCE Panel-Radiator
16/2 20/2	87,4	79,0	+ 10,6%
24/2 3/03	115,9	82,9	+39,8%
19/3 8/04	221,7	178,2	+24,4%

## RESULTS OF SECOND TEST CAMPAIGN

Total energy consumed from 23/11 to 15/04  
 Continuous 24 hour operation  
 Discontinuous operation with 3 time-bands  
 Radiant panel on/off regulation  
 Radiator on/off regulation  
 Radiant panel average delivery temperature: 35 °C  
 Heat pump set-point temperature: 40 °C  
 Radiant panel active energy: 1.756,700 kW  
 Radiator active energy: 1.591,400 kW

## RADIANT PANEL CONSUMPTION +10.4%

The second test campaign was conducted with a structure oriented at optimizing the radiant panel system (continuous operation at low temperature) while feeding radiators with water at higher temperatures at the same time (a choice that penalizes heat pump efficiency and consumption)

## THE ENERGY CONSUMPTIONS OF THE RADIANT PANEL system exceeded those of the RADIATOR system by 10 - 40%

### COMPARISON OF THE PERFORMANCES OF THE TWO SYSTEMS

The data selection criteria permitted the identification of the five days that may be considered representative of the different conditions of operation of the two systems in question.

Radiant panel systems clearly show higher thermal consumptions than radiator systems with differences in the range of 4 - 44% on the typical test days considered.

The differences are minimal under continuous operation but increase significantly with time-band operation, in this way confirming the tendency of radiant panels to operate continuously due to their high thermal inertia.

The thermal consumptions of each of the two systems were obtained from the differences in water delivery and return temperatures and the ambient temperature after electrical absorption values were detracted

The results showed the radiator system to have less thermal consumption, varying from 5% under continuous operation (optimum for radiant panels) to 40% for highly discontinuous operation.

The difference between the electric power consumptions and the thermal consumptions of the two systems gradually increased as the warmer months approached in which reduced requests for heat increased the incidence of the heating circulators.

- In all tests, the average temperature of the room with radiant panels was observed to be higher than the room with radiators due to the higher thermal inertia of the radiant panels.
- This explains also why the radiant panel system generally consumes more energy than radiators during hours in which operation is discontinuous.

The table provides total thermal and electric power consumptions in the 24 hours of the five typical days

TYPICAL DAY	Tot. Thermal Consumption		DIFFERENCE Thermal consumption Panel-Radiator	Electric Power Consumption		DIFFERENCE electric consumption Panel-Radiator
	PANELS kWh	RADIATORS kWh		PANELS kWh	RADIATORS kWh	
1	41,5	39,7	+ 4,5%	17,1	15,2	+12,5%
2	33,1	26,5	+24,9%	15,0	10,3	+45,6%
3	19,3	16,7	+15,6%	10,2	9,2	+10,9%
4	17,7	9,9	+78,8%	9,6	7,2	+33,3%
5	13,6	11,6	+17,2%	8,5	3,6	+ 236%

## THE USER CAN ASSESS HOW MUCH SAVING CAN BE MADE USING THE RADIATOR HEATING SYSTEM IN DISCONTINUOUS OPERATION

The absence of radiators occupying wall space is proposed as an advantage offered by floor heating, which makes no visual impact of its own, but choosing attractive radiators with original shapes built expressly for the spaces available can enable authentic interior architecture that can be personalized by color or rendered nearly invisible by matching the finishing given to the walls

Making the right decision to heat your home is a choice of fundamental importance: the highly vaunted economic advantages of the radiant panel system have been proven to be untrue. The possibility to switch heating on and off quickly and suddenly (the one and only real saving in energy) is still the most appropriate solution today.

# GENERAL CONDITIONS OF SALE

## PRICE LIST 2021 BEGINNING FROM 1 JANUARY 2021 - VAT EXCLUDED

PRICE FROM 10.1.2022 **+10%**

### ORDERS

The selling of BREM products DDU UK retailers according to INCOTERMS 2000, is ruled by the general conditions hereafter listed. Further changes will be valid only if confirmed by us in writing.

The order confirmation must be checked when received, if, within 2 calendar days, further information does not follow, the confirmation is considered valid to start manufacturing.

BREM reserves the right to add modifications to the dimensions and to effect differentiated deliveries for goods in the warehouse and goods in manufacturing.

The technical specifications concerning the BREM radiators, which involve the tolerance of use, must be considered as approximate and subject to variations.

### ORDER MODIFICATIONS

Variations and cancellations of orders are subject to our written approval.

The costs already met will be debited to the buyer. Orders with a fixed-time confirmation can be cancelled or modified only within the delivery term.

The possible modifications, subject to the BREM written approval, to be made on radiators in manufacturing, involve an additional charge of 40-70% of the cost of the radiator; if the required modifications are not possible, the radiator will be completed as standard and debited as the order confirmation.

### DELIVERY

All goods shall be delivered, upon the terms in the confirmation of order that indicates the loading date, by means of BREM's handing over the goods to the shipper who is then responsible for actual delivery of the goods.

Should the reseller fail to pick up the delivered goods, the Company reserves the right to debit the reseller the cost and liability of storage and the materials shall be invoiced as normal.

BREM s.r.l. reserves the right to choose the packaging type; special packing materials shall be invoiced separately.

If there is a delay in delivery of the goods by BREM for technical reasons or reasons involving product quality, the reseller may not refuse delivery or collection of the goods ordered.

### CLAIMS AND RETURNS

Claims for damage due to transport or lost goods must be pointed out on signing the delivery note with reservation for the received goods, and informing BREM s.r.l. in writing within two days.

Claims for visible manufacturing faults must be communicated at the moment of the un-packaging and before mounting the radiator. No return will be accepted without our written approval. Damaged radiators or with manufacturing defects must be returned to the company for suitable repairs as these are made-to-measure goods.

### PAYMENT

Unless otherwise agreed, all invoices shall be paid within 30 days, in full and without further discounting.

All delivered goods remain the property of BREM until full payment is made; in the event of non-payment, Brem s.r.l. reserves the right to withdraw any unpaid goods.

### TOLERANCES

Brem radiators are built with great care: the machining and welding at up to 1085° may cause expansion and stretching (tolerance  $\pm$  3mm)

### GUARANTEE

BREM radiators are guaranteed for three years, beginning from the delivery day, provided that they have been used in the appropriate way and the installation has been performed correctly.

All accessories are guaranteed for two year. Any components that are found to have manufacturing or material defects within the warranty period shall be repaired free of charge upon request (in writing), ex your works, without making any changes to the structure or color.

All returns (defective materials) shall be packed and sent to our production site using our courier, after obtaining our written authorization to do so.

Any transport damages due to inadequate packaging will be charged.

The guarantee does not cover products which have not been paid for and products which have been damaged by:

- unsuitable storage of radiators without the plastic packaging and/or in humid locations
- incorrect installation and use;
- incorrect maintenance: cleaning with aggressive detergents can ruin the surface; clean the surface using a damp cloth and polish it with car wax;
- installation carried out by unqualified personnel
- repairs carried out without written permission from BREM s.r.l.;
- addition of aggressive chemical products in the heating system water;
- periodical emptying of the heating system;
- connection to heating systems with an open expansion tank, or to water treatment equipment or to overloaded systems;
- operating pressures higher than those in the technical specifications;
- connection to sanitary water apparatus.
- using hemp on fittings supplied with an O-ring

### APPLICABLE LAW

For all unforeseen issues and in case of dispute, the applicable law to each supply is Italian law (Court of Bergamo, Italy).
